OpenCable™ Specifications Host Extensions

OpenCable Host Home Networking Extension 2.0

OC-SP-HOST-HN2.0-I02-090508

ISSUED

Notice

This OpenCable specification is the result of a cooperative effort undertaken at the direction of Cable Television Laboratories, Inc. for the benefit of the cable industry and its customers. This document may contain references to other documents not owned or controlled by CableLabs. Use and understanding of this document may require access to such other documents. Designing, manufacturing, distributing, using, selling, or servicing products, or providing services, based on this document may require intellectual property licenses from third parties for technology referenced in this document.

Neither CableLabs nor any member company is responsible to any party for any liability of any nature whatsoever resulting from or arising out of use or reliance upon this document, or any document referenced herein. This document is furnished on an "AS IS" basis and neither CableLabs nor its members provides any representation or warranty, express or implied, regarding the accuracy, completeness, noninfringement, or fitness for a particular purpose of this document, or any document referenced herein.

Document Status Sheet

Document Control Number:	OC-SP-HOST-HN2.0-I02-090508			
Document Title:	OpenCable Host Home Networking Extension 2.0			
Revision History:	I01 – Released 4/18/08			
	I02 – Released 5/8/09			
Date:	May 8, 2009			
Status:	Work in Progress	Draft	Issued	Closed
Distribution Restrictions:	Author Only	CL/Member	CL/Member/Vendor	Public

Key to Document Status Codes:

Work in Progress	An incomplete document, designed to guide discussion and generate feedback, that may include several alternative requirements for consideration.
Draft	A document in specification format considered largely complete, but lacking review by Members and vendors. Drafts are susceptible to substantial change during the review process.
Issued	A stable document, which has undergone rigorous member and vendor review and is suitable for product design and development, cross-vendor interoperability, and for certification testing.
Closed	A static document, reviewed, tested, validated, and closed to further engineering change requests to the specification through CableLabs.

Trademarks

CableLabs®, DOCSIS®, EuroDOCSIS™, eDOCSIS™, M-CMTS™, PacketCable™, EuroPacketCable™, PCMM™, CableHome®, CableOffice™, OpenCable™, OCAP™, CableCARD™, M-Card™, DCAS™, tru2way™, and CablePC™ are trademarks of Cable Television Laboratories, Inc.

This page left blank intentionally.

1 SCOPE

1.1 Introduction and Overview

The OpenCable Host specification [HOST2.1] defines bidirectional digital set-top boxes (OCS2) and bidirectional integrated terminal devices (OCT2). This specification defines the requirements for either OCS2 or OCT2 devices to be extended to include IP-based Phase 2 home networking support and enable home networking features to be implemented using the OCAP Home Networking Extension specification [OCAP HN]. Phase 2 home networking includes support for new physical networks, QoS, and secure transmission of MSO premium content.

Three primary use cases are specifically supported to enable multi-room DVR functionality. The three use cases are:

- Playback of DVR-recorded content from a non-DVR device,
- Scheduling DVR recording from a non-DVR device,
- Trick Modes (Pause/rewind/fwd) from a non-DVR box.

1.2 Purpose of document

This specification defines minimum technical requirements that must be added to an OpenCable Host device to support OCAP Phase 2 Home Networking Extensions.

1.3 Requirements

Throughout this document, the words that are used to define the significance of particular requirements are capitalized. These words are:

“SHALL”	This word means that the item is an absolute requirement of this specification.
“SHALL NOT”	This phrase means that the item is an absolute prohibition of this specification.
“SHOULD”	This word means that there may exist valid reasons in particular circumstances to ignore this item, but the full implications should be understood and the case carefully weighed before choosing a different course.
“SHOULD NOT”	This phrase means that there may exist valid reasons in particular circumstances when the listed behavior is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behavior described with this label.
“MAY”	This word means that this item is truly optional. One vendor may choose to include the item because a particular marketplace requires it or because it enhances the product, for example; another vendor may omit the same item.

2 REFERENCES

2.1 Normative References

In order to claim compliance with this specification, it is necessary to conform to the following standards and other works as indicated, in addition to the other requirements of this specification. Notwithstanding, intellectual property rights may be required to use or implement such normative references.

3 TERMS AND DEFINITIONS

This specification contains the following terms and definitions.

OpenCable Digital Media Player	An OpenCable Home Networking device capable of playing digital media across an IP-based network. It is a UPnP-compliant Digital Media Player with additional requirements imposed by OpenCable.
OpenCable Digital Media Server	An OpenCable Home Networking device capable of serving digital media across an IP-based network. It is a UPnP-compliant Digital Media Server with additional requirements imposed by OpenCable.

4 ABBREVIATIONS AND ACRONYMS

This specification uses the following abbreviations:

AV	Audio/Video
HNHost	Home Networking Host
LAN	Local Area Network
MAC	Media Access Control
OC-DMP	OpenCable Digital Media Player
OC-DMS	OpenCable Digital Media Server
OCAP	OpenCable Application Platform Specification
OCAPHN	OCAP Home Networking Extension

5 TECHNICAL REQUIREMENTS

This section contains the technical requirements for this specification.

5.1 General Requirements

5.1.1 OpenCable HOST 2.1 Compliance

REQ4033 The HNHost SHALL comply with all normative requirements in [HOST2.1].

REQ4034 If the HNHost implements Digital Video Recorder (DVR) functionality, the device SHALL comply with all normative requirements in [HOST DVR].

5.1.2 Middleware

REQ4035 The HNHost SHALL comply with all normative requirements of [OCAP HN].

REQ4036 The HNHost SHALL support the mapping between the OCAP Home Networking Extension API [OCAP HN] and LAN protocol messaging as defined in [HNP2].

5.2 Network Interface

5.2.1 Physical and MAC Layers

REQ4037 The HNHost SHALL implement at least one physical network interface that meets the requirements as specified in [RSD TECH]. Such network interface is termed the RSD Technology interface.

REQ4386 If an HNIMP includes a MoCA interface, it SHALL do so as per the [MoCA] and [MoCA Ext] specifications.

REQ4038 The HNHost MAY provide a 10BASE-T / 100BASE-TX Ethernet physical interface and MAC layer for the LAN interface as specified in IEEE 802.3i and IEEE 802.3u [IEEE 802.3].

REQ4039 The HNHost MAY implement bridging between multiple physical network interfaces as defined in [IEEE 802.1D].

5.2.2 Network Layer

REQ4040 The HNHost SHALL provide a network and transport layer for the LAN interface as specified in [HNP2].

5.3 Media Types

REQ4041 The HNHost SHALL support rendering of AV media types and formats as specified in [HOST2.1], [OCAP], and [HNP2]. This includes both broadcast streaming and monomedia-based content formats.

REQ4042 The HNHost SHALL support serving of AV media types and formats as specified in [HOST2.1], [OCAP], and [HNP2] if the device implements [HOST DVR]. This includes both broadcast streaming and monomedia-based content formats.

5.4 Quality of Service (QoS)

REQ4043 The HNHost MAY implement RSD Manager and RSD Controller functionality as defined in [RSD PROT].

REQ4044 If the HNHost consists of only one RSD Technology interface or multiple non-bridged RSD Technology interfaces, then the HNHost SHALL implement RSD Host functionality as defined in [RSD PROT].

REQ4045 If the HNHost implements multiple bridged RSD Technology interfaces, then the HNHOST SHALL comply with the RSD Bridge functionality as defined in RSD-PROT Specifications [RSD PROT].

REQ4046 If the HNHost implements Ethernet interface that is bridged to the RSD Technology interface, then the HNHost SHALL comply with the PSD Bridge functionality as defined in the [RSD PROT] specifications.

5.5 Content Security

REQ4047 The HNHost SHALL follow encoding and distribution rules for distribution of protected cable-delivered content as specified by [47CFR76].

5.6 Device Interoperability

REQ4048 The HNHost SHALL comply with the requirements specified in [HNP2].

5.7 SNMP MIBs

REQ4049 The HNHost SHALL comply with the requirements specified in [HNP2].

5.7.1 MoCA SNMP MIBs

REQ4387 When an HNHost supports a MoCA network interface, it SHALL make the MoCA SNMP MIBs available to applications from the MIBManager API at the OIDs defined by the [MoCA SMI] specification. See the [MoCA] specification for the MoCA MIB definition.

The [OCAP] specification defines how applications are granted read and write access to Host device MIBs.

5.8 Jitter

The HNHost performs the de-jitter operation. The MPEG standard allows only about 4-ms of jitter. Network jitter often may exceed this threshold. The HNHost provides a de-jitter buffer.

REQ4050 When operating as an OC-DMP, the HNHost SHALL support a de-jitter operation and provide a de-jitter buffer of at least 200 ms.

REQ4051 When operating as an OC-DMS, the HNHost SHALL maintain an index file based on PCR chunks and provide a de-jitter buffer of at least 200 ms.

Appendix I Revision History

The following ECN was incorporated into OC-SP-HOST-HN2.0-I02-090508:

ECN	Accepted Date	Title
HOST-HN2.0-N-09.1383-1	4/17/09	Inclusion of MoCA, MoCA MIBs, and mandatory RSD support
